Adding methods of driver installation step

There would be some problems when some computers are installing the Drivers. For instance, the Driver's icon cannot be found in the tab of "Devices and Printers" after finishing the installation. In this case, the printer could be added to the computer through the following methods.

1 Take Win7 32 bit system as an example. Enter into "Control Panel" of the computer and open the Devices and Printers", as shown in the following picture.

2、Click "Add Printer" button and then select "Add a local printer". Choose "Next Step", See the picture as below:

3、 Default LPT port, Choose "Next Step", see below:

4、 Choose "Have Disk..." to install. See the picture below:

nstall the printer dri	ver	
Choose your prin	nter from the	e list. Click Windows Update to see more models.
To install the driv	ver from an	installation CD, click Have Disk.
Manufacturer	*	Printers
